Finlex Product Overview

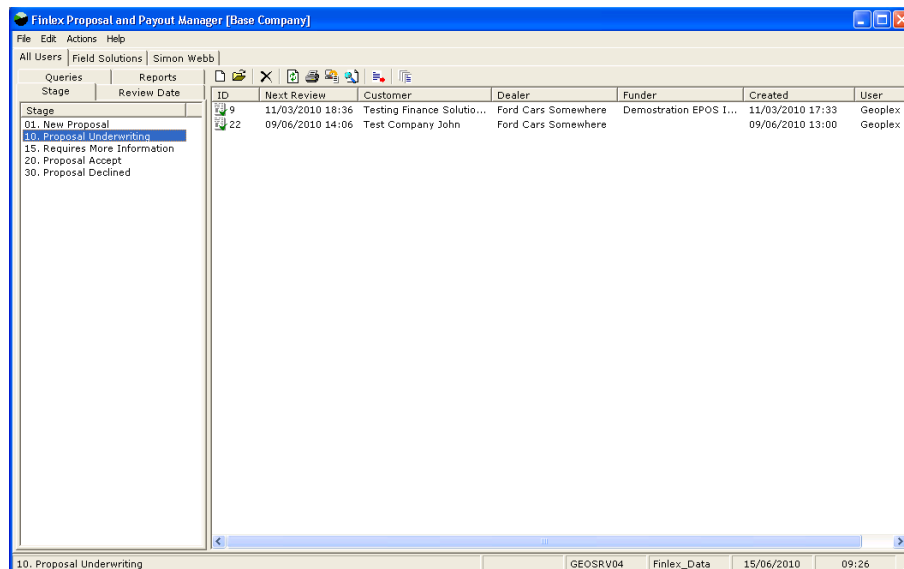

Advanced features, value for money, speed of deployment and simplicity of use

Finlex is a well established asset finance contract administration solution. It provides full functionality for finance companies, brokers, and block discounters to manage their own book. The software forms the administration component of Field Solutions' asset finance business process framework and forms part of a truly transparent and seamless end-to-end solution from origination through to administration. Finlex allows you to manage both your contracts with your clients and your funding arrangements with your funder.

Finlex has the following features:

- Fast proposal load.
- Supports contracts with structured repayment profiles.
- Information includes hirer, the asset, equipment supplier, guarantors and brokers.
- Supports Loan / Hire Purchase / Lease contract types.
- Supports CCA regulated and unregulated contracts.
- Production of all relevant finance contracts.
- Raises annual VAT invoices and invoices for individual rentals.
- Paperless mandates and collection by direct debit.
- Arrears management functionality including arrears letters.
- Settlement quotes, early settling contracts (support for CCA regulated settlements).
- Extensive reports to support management information and the production of accounts.

Finlex has the following features designed to support your funding arrangements:

- Funders and individual funding schedules (block discounting or back to back leases).
- Identify unencumbered contracts and attach them to a funding schedule.
- Auditing of funding schedules, topping up funding arrangements with replacement paper.
